

3. Create a Azure Function App with VS Code

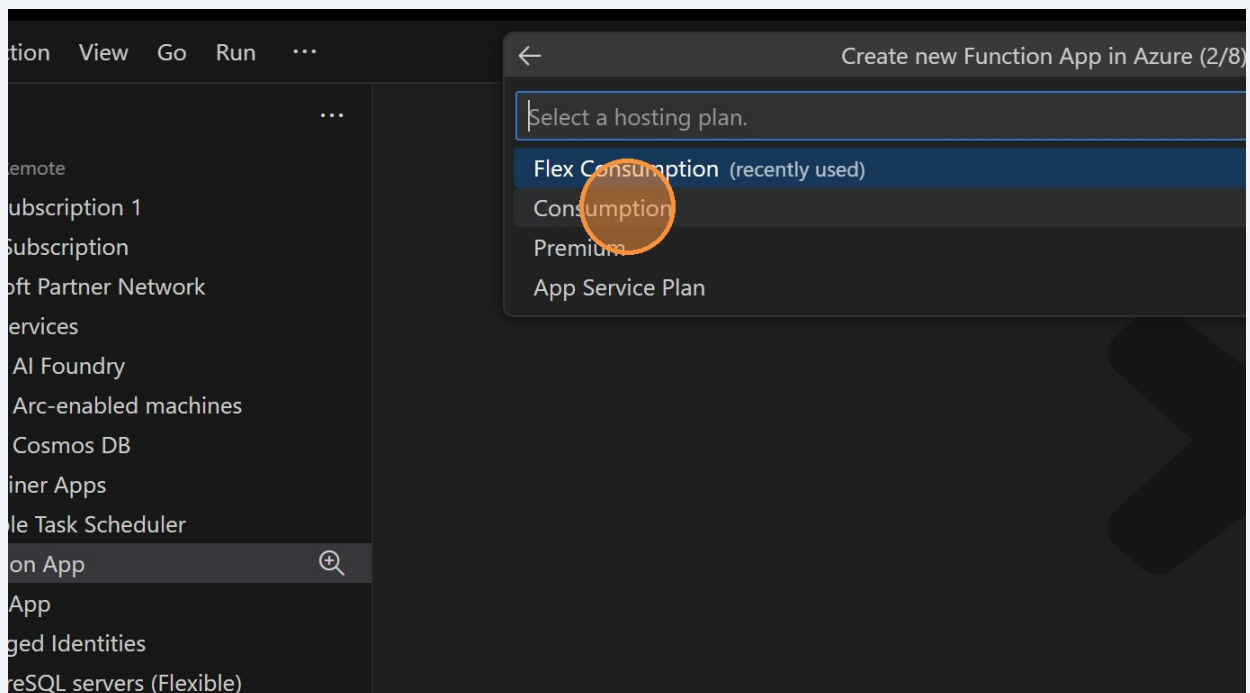

1 Right click "Function App"

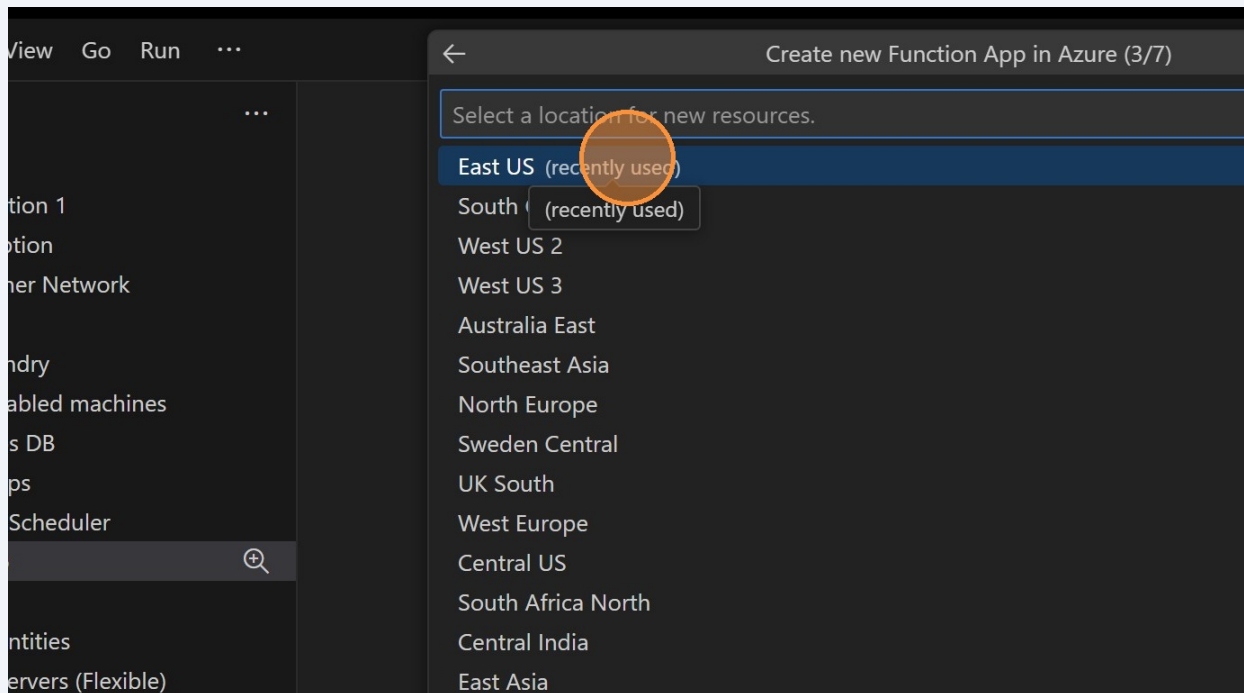

2 Click "Create Function App in Azure... (Advanced)"

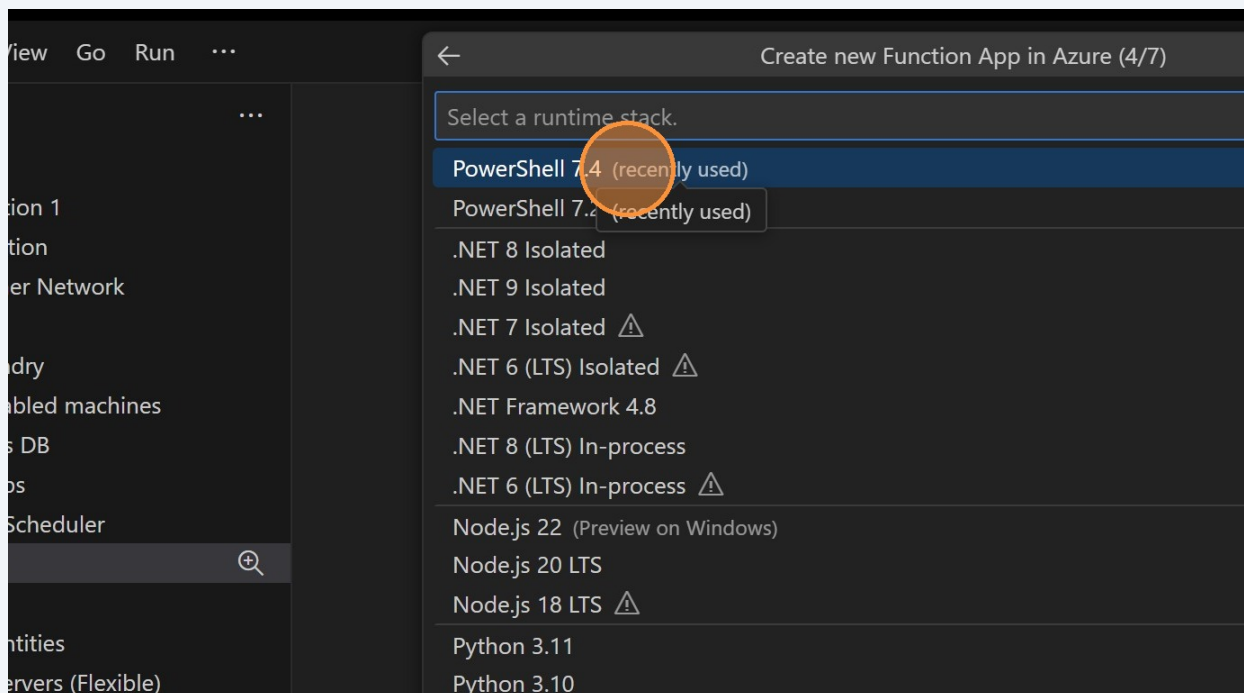

3 Click "Consumption"

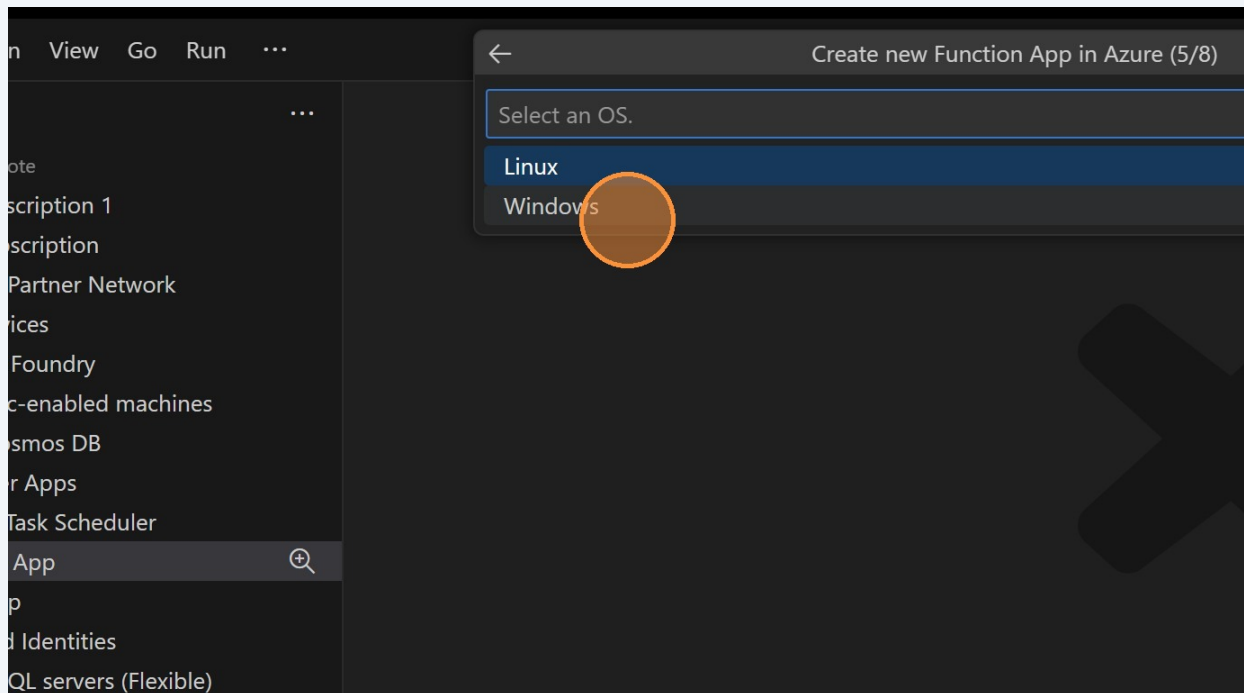

4 Click "East US"

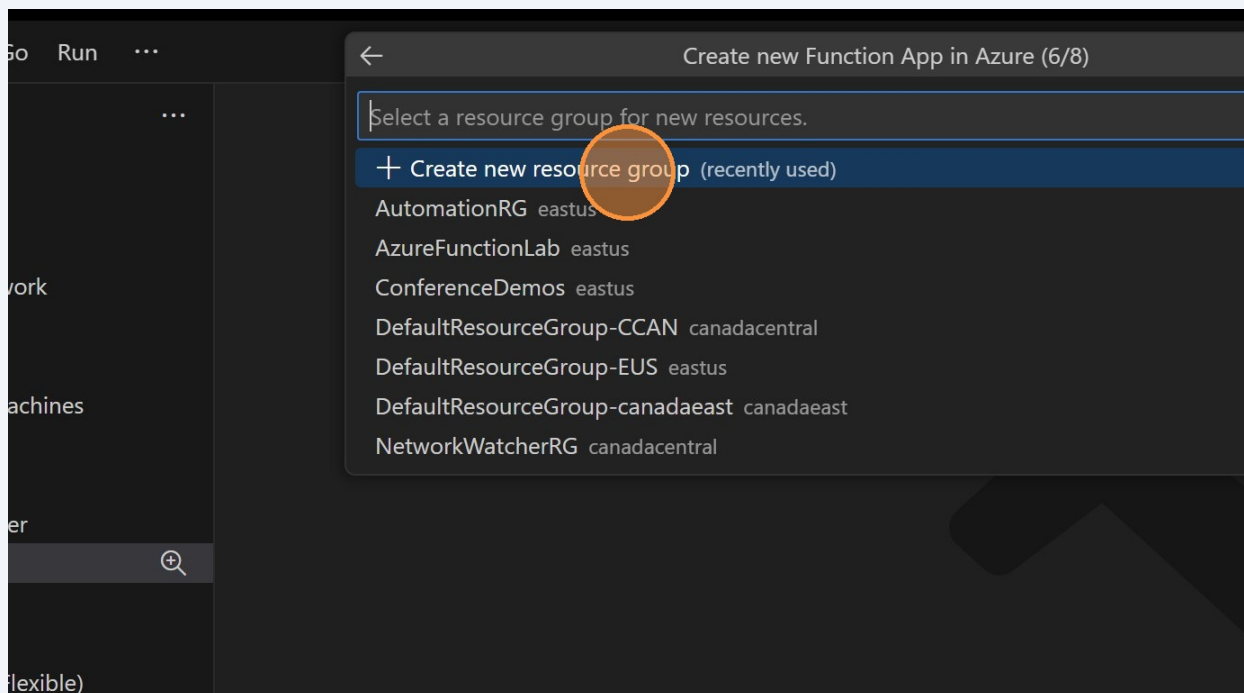

5 Click "PowerShell 7.4"

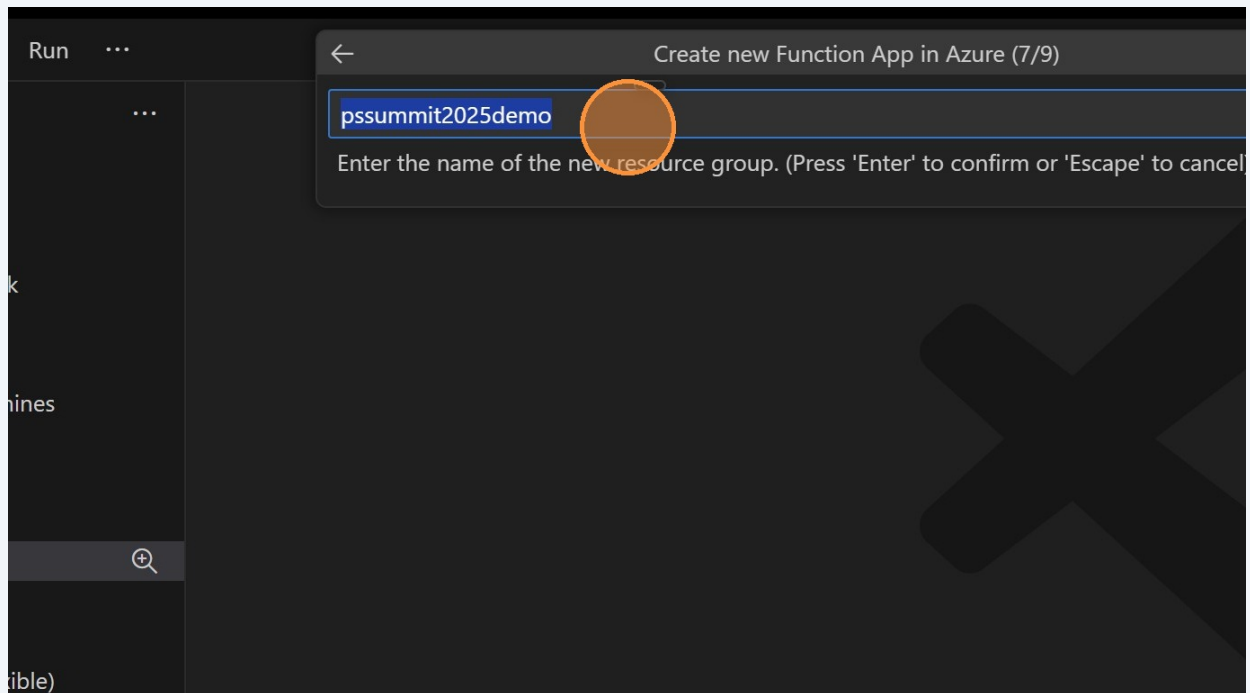

6 Click "Windows"

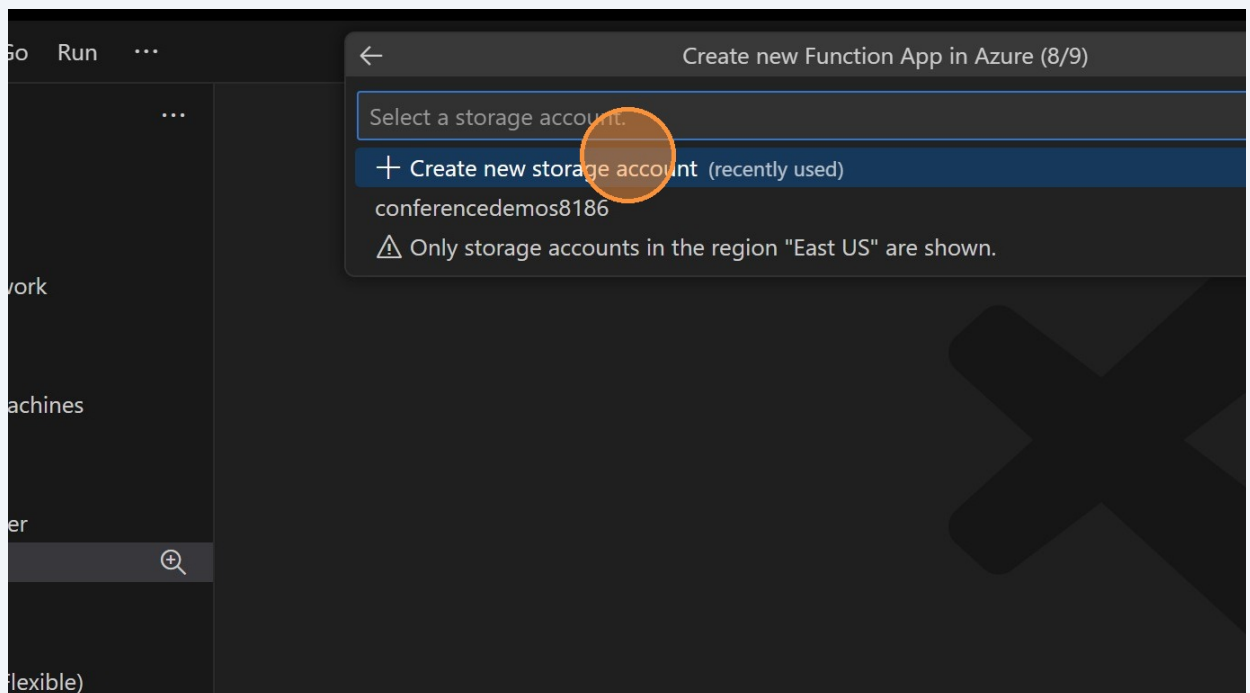

7 Click "Create new resource group"

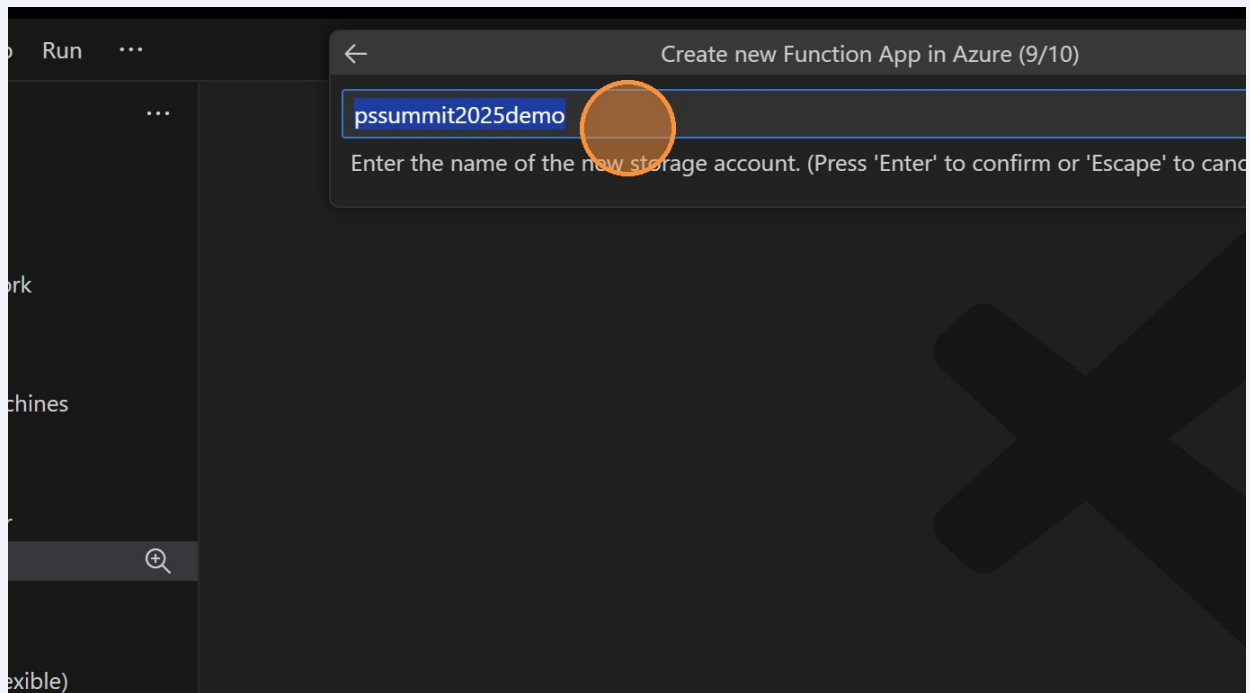

8 Enter resource group name "pssummit2025demo" and Press **Return**

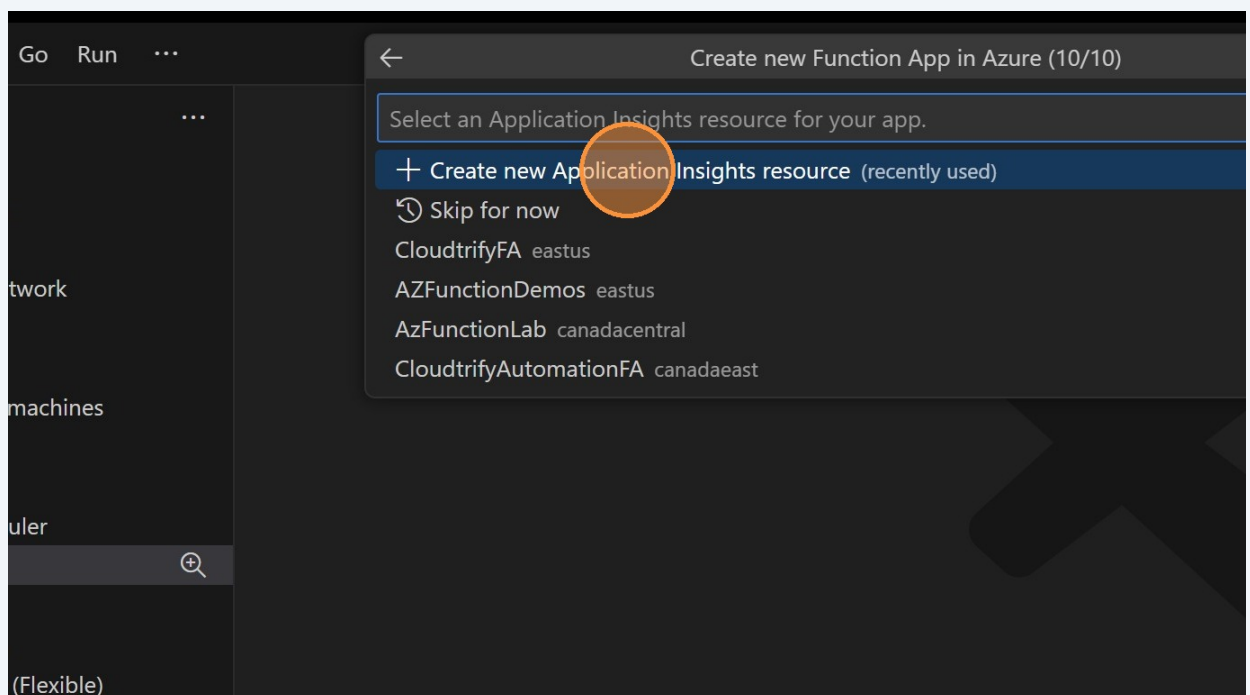

9 Click "Create new storage account"

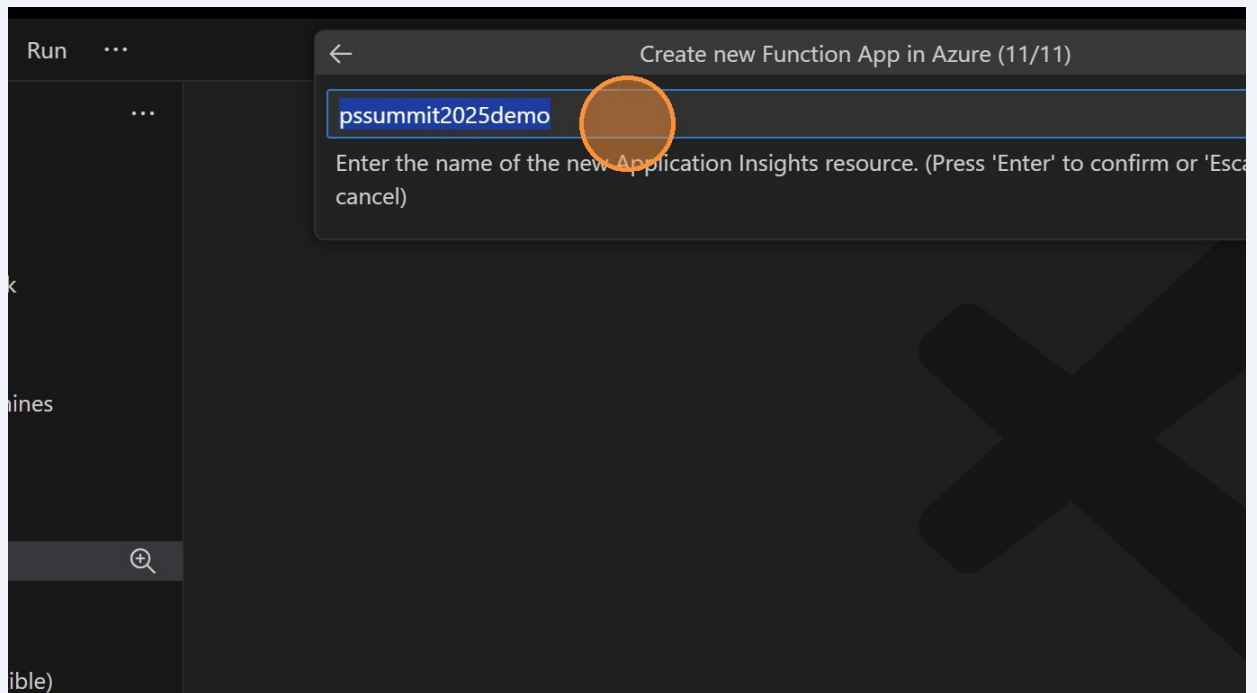

10 Click "pssummit2025demo" and Press **Return**

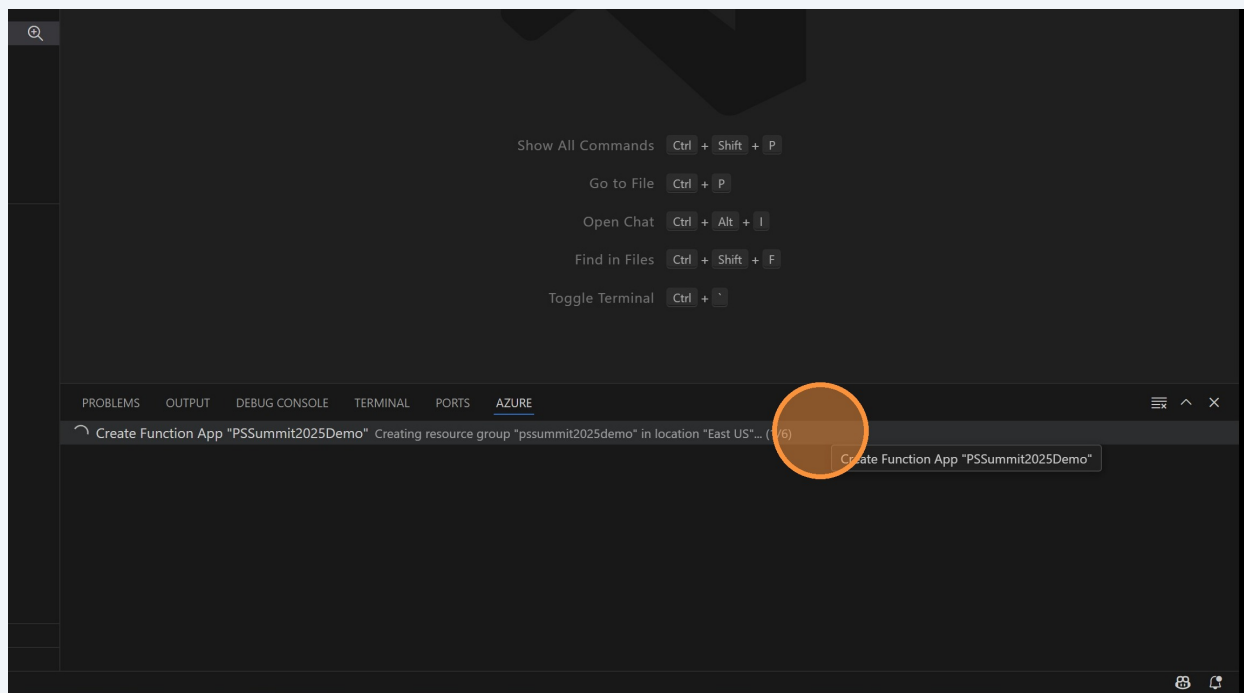

11 Click "Create new Application Insights resource"

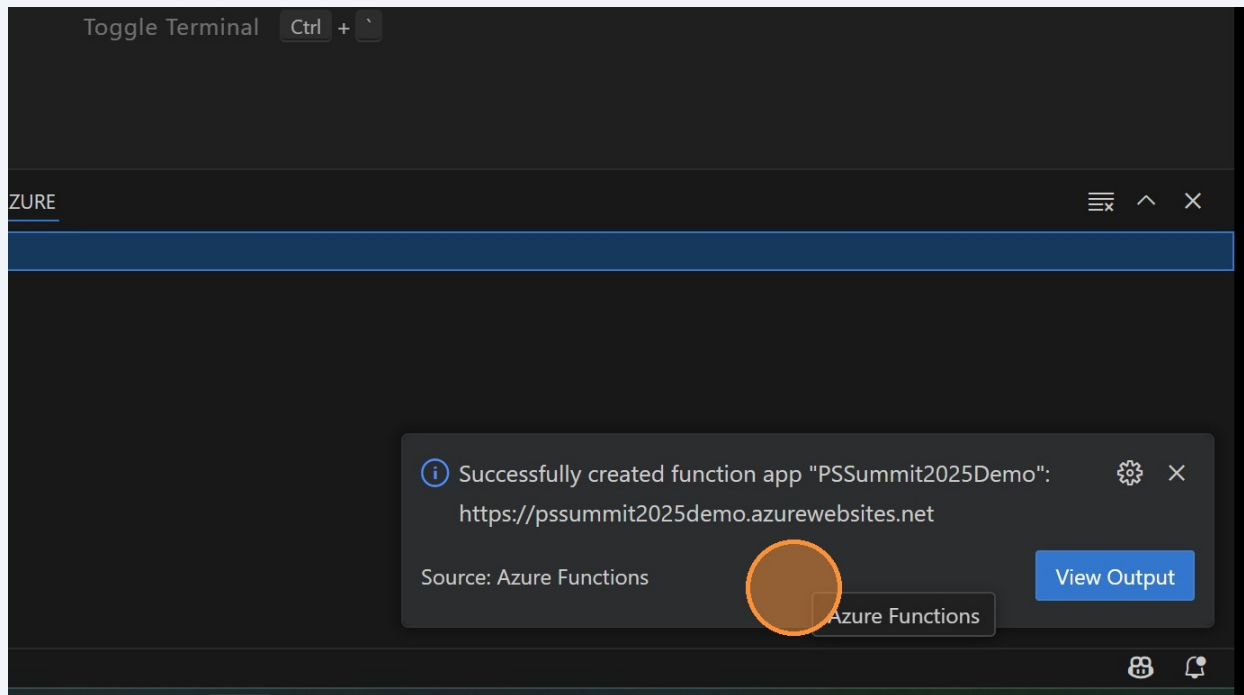

12 Click "pssummit2025demo" and Press **Return**

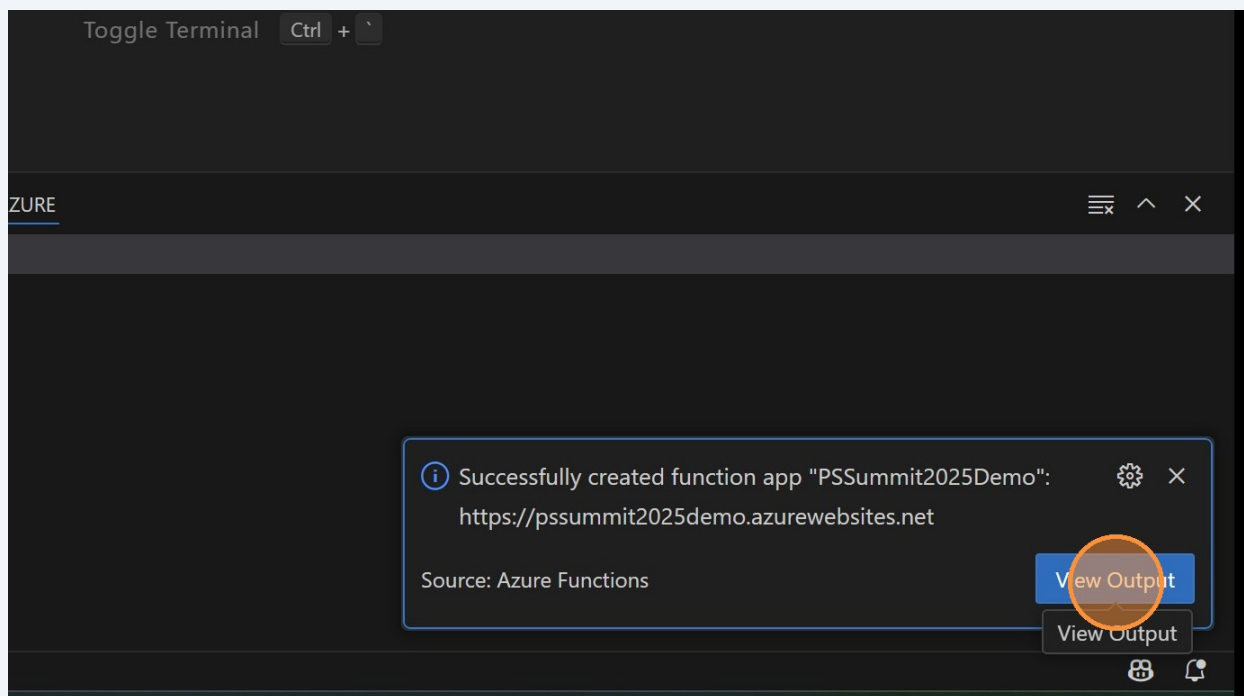

13 Creation of Function App is in progress

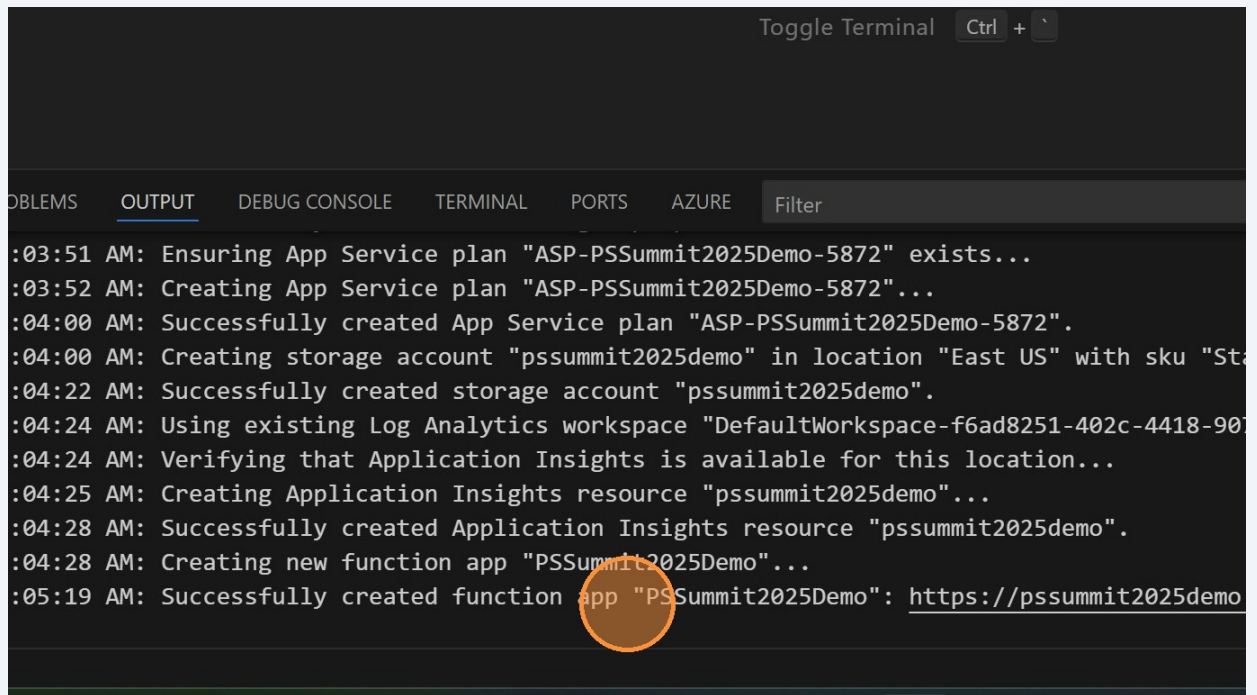

14 Function App is successfully created

15 Click "View Output" to check detailed logs.

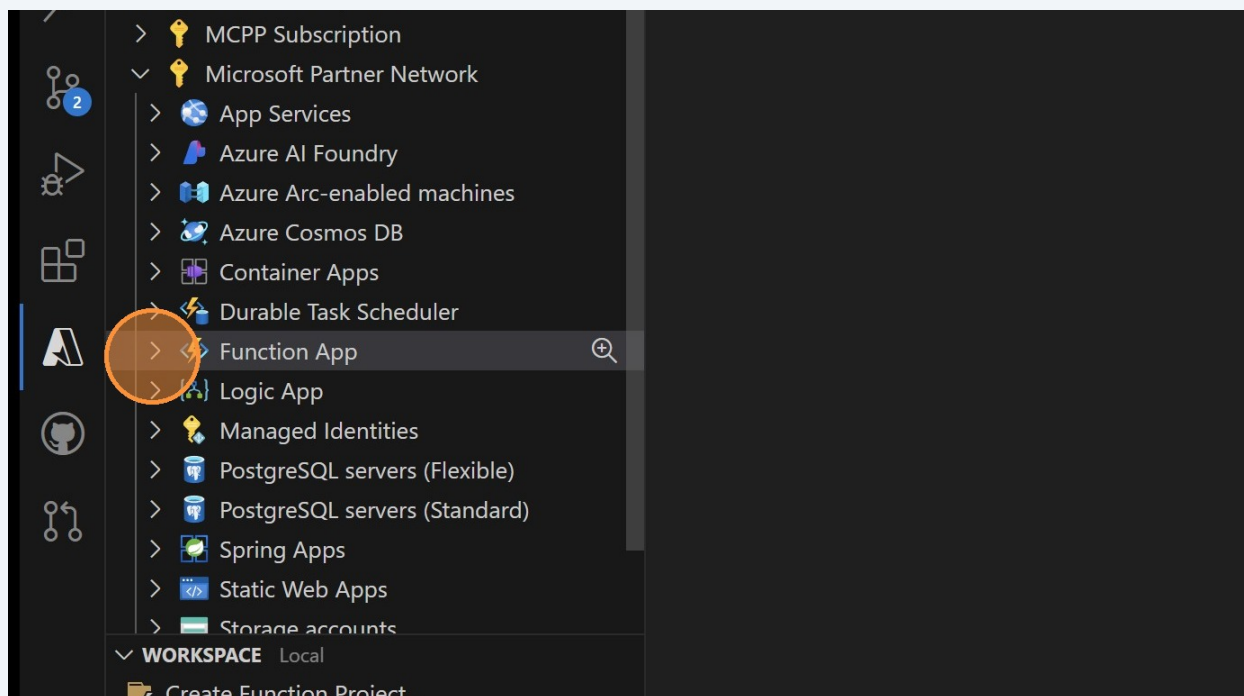

16 Output

The screenshot shows the 'OUTPUT' tab in Visual Studio Code. The output log details the steps for creating an App Service plan, a storage account, and an Application Insights resource, followed by the creation of a new function app. The final line shows the successful creation of the function app 'PSSummit2025Demo' with its URL.

```
Toggle Terminal Ctrl + `
